## RESTRICTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 22**, drawn to a forging die, classified in class 72, subclass 325.
- II. Claims 13-20**, drawn to a liquid ejection head, classified in class 239, subclass 589.
- III. Claim 21**, drawn to a method for producing a liquid ejection head, classified in class 29, subclass 890.142.

The inventions are distinct, each from the other because:

Inventions I and II, respectively, are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the product can be made without recourse to the forging die. For example, the liquid ejection head can be made by drilling.

Inventions III and II, respectively, are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made without recourse to the claimed method. For example, the recesses in the liquid ejection head can be made by EDM, chemical milling or simple machine drilling.

Art Unit: 3725

Inventions III and I, respectively, are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to produce perforated plates adaptable for filters.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Similarly, the search required for Group II is not required for Group III and the search for Group III is not required for Group I.

## **ELECTION**

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
